All design must not compromise safety

* Referenced to ASHRAE Guideline for the Classification of Chemical Laboratories

^ exclude lab specialised fittings and/or emergency fittings
## Part 1 – Sustainable Design

### Lab 1-1 Leadership

<table>
<thead>
<tr>
<th>Lab 1-1a Organisation Governance</th>
<th>Green Mark Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maintain governance system to allow senior management to guide the organisation to achieve sustainability and ensure safety in laboratories operation.</td>
<td>1 point each (up to 3 points)</td>
</tr>
<tr>
<td>- Establish key appointment holders for laboratories operation with organisation chart made known to lab users</td>
<td></td>
</tr>
<tr>
<td>- Regular update to senior management</td>
<td></td>
</tr>
<tr>
<td>- Policies review, including risk management and sustainability drives, that involve senior management</td>
<td></td>
</tr>
<tr>
<td>- Senior management committed to environmental policy</td>
<td></td>
</tr>
</tbody>
</table>

### Lab 1-2 Design and Operation

<table>
<thead>
<tr>
<th>Lab 1-2a Sustainable Laboratory Design</th>
<th>Green Mark Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>i) Integrative design process</td>
<td>1 point</td>
</tr>
<tr>
<td>Encumbrates the establishment of collaborative framework for the design and operational professionals in the early planning stages of the project to encourage value added contributions and constructive discussion through documented design workshop(s). Parties would include representatives from owner(s), users, M&amp;E and lab experts etc.</td>
<td></td>
</tr>
<tr>
<td>ii) Sustainable planning</td>
<td>1 point each</td>
</tr>
<tr>
<td>- Performs design/audit and ROI evaluation prior to renovation</td>
<td></td>
</tr>
<tr>
<td>- Conduct regular laboratory infrastructure, energy and hazard assessment</td>
<td></td>
</tr>
<tr>
<td>iii) Continual improvement</td>
<td>1 point</td>
</tr>
<tr>
<td>Introduce permanent committee to evaluate laboratory for continual improvement. Committee has regular scheduled meeting with members of technical expertise.</td>
<td>(Up to 3 points)</td>
</tr>
</tbody>
</table>

### Lab 1-2b Sustainable Laboratory Operation

| Encourage selection of sustainable base building Building awarded with BCA Green Mark Award | GM Platinum (6 points) GM GoldPlus (4 points) GM Gold (3 points) |
### Part 1 – Sustainable Design

<table>
<thead>
<tr>
<th>Green Mark Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>or Laboratory demonstrates energy saving over the last 8 quarters (against own historical baseline)</td>
</tr>
<tr>
<td>or Laboratory demonstrates energy saving for particular equipment over the last 8 quarters (against own historical baseline)</td>
</tr>
</tbody>
</table>

| or 1 point for every 2% energy saving over laboratory’s total energy consumption |

### Lab 1.2c Environmental Credentials of Project Team

This pertains to the appointment of environmental specialists at building design, construction and operation stages.

#### (i) Green Individuals:

Key project members has any of the following qualifications:

- Certified Green Mark Manager (GMM)
- Certified Green Mark Facilities Manager (GMFM)
- Certified Green Mark Professional (GMP)
- Certified Green Mark Facilities Professional (GMFP)
- Singapore Certified Energy Manager (SCEM) as key project members

1 point for GMM, GMFM, WSHO, SCEM (Associate)  
1 point for GMP, GMFP, SCEM (Professional)

#### (ii) Safety Individuals

- Registered Workplace Safety and Health Officer (WSHO)
- Various internationally recognised certification such as:  
  - Registered Biosafety Professional
  - Certified Industrial Hygienist
  - Certified Safety Professional

1 point each  
(may have up to 2 different classification of certification per individual)  
(Up to 5 points for green individuals)

#### (iii) Green Team:

- Project team’s companies are ISO 14001 / OHSAS 18001 certified: Laboratory owner, M&E Engineer, C&S Engineer, Laboratory consultant or Main/specialist Contractor.

1 point each

- SGBC Green Services Certified firm.

1 point each  
(Up to 3 points for green team)  
(Up to 6 points for Environmental Credentials)
### Part 1 – Sustainable Design

#### Lab 1.2d User Engagement

This refers to the provision of relevant information and guidance to building occupants as to how they can contribute positively to the reduction of the building’s environmental impact.

1. Green guide for laboratory occupants should be disseminated. Best practices pertaining to reduction of energy use, water use and maintenance of a good indoor environment should be documented in this green guide. Evidence of laboratory occupants’ involvement in environmental sustainability should also be demonstrated.

2. Periodic energy awareness program to inform lab users of the energy usage (with the use of electrical submeters) from the laboratories activities which can be used to drive continuous improvement.

#### Part 1 – Sustainable Leadership

#### Lab 1-3 Urban Harmony

**Lab 1-3a Sustainable Commuting**

Promote the use of sustainable commuting to reduce pollution from individual car use.

1. Provision of bus services to pool staff to work and/or after work
2. Provision of regular shuttle buses to ferry staff between premises during office hours
3. Encourage staff to use public transport, bicycle or other human-powered/electric personal transportation through awareness and incentive programs
4. Allocation of spaces to encourage sustainable commuting such as sheltered bicycle lots, showers and lockers facilities
5. Foster effective carpooling program (involving at least 15% of staff)

#### Lab 1-3b Greenery provision

Encourage greater use of greenery to create a more conducive laboratory environment, particular for the support and common areas.

1. Provision of access to greenery at common spaces
2. Provision of planters or plotted plants, within laboratory and its support areas as well as corridors connecting them.

### Green Mark Points

<table>
<thead>
<tr>
<th>Extent of Coverage</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.1% of lab areas or 2 pots per 100m² of lab areas</td>
<td>1</td>
</tr>
<tr>
<td>0.2% of lab areas or 4 pots per 100m² of lab areas</td>
<td>2</td>
</tr>
</tbody>
</table>

(Up to 2 points)
## Part 2 – Lab Energy Performance

### Lab 2-1 Energy Efficiency

#### Lab 2-1a Air Conditioning System Efficiency

Encourage the use of more efficient air-conditioning to minimise energy consumption.

(i) Cooling system
- Water cooled chilled water system
- Air cooled chilled water system/Unitary Air-Conditioning System

(ii) Air distribution system

1 point for meeting 0.8 kW/ton and 1 point for each 0.1 kW/ton improvement (up to 3 points)*

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Baseline</th>
<th>Improvement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Air distribution performance</td>
<td>1 point for meeting 0.35 kW/ton</td>
<td>1 point for each 15% improvement</td>
</tr>
<tr>
<td>AHU’s weighted average face velocity</td>
<td>1 point for meeting 2.2 m/s</td>
<td>1 point for each 5% improvement</td>
</tr>
</tbody>
</table>

Scoring based on either:
- Air distribution performance
- AHU’s weighted average face velocity

Full credit based on measured readings and half credit based on nameplates. (up to 5 points)*

(up to 8 points for DCS or A/C under landlord that is not related to tenant)*

### Additional credit for Physical Laboratories

Additional 1 point for every 10% improvement for air distribution system (up to 2 points)*

*full point for design for natural ventilation

### Lab 2-1b Ventilation optimisation

#### Design

(i) Adopt risk based assessment to minimise lab ventilation rate

(ii) Segregation of areas with different ACH design for more than 70% of applicable areas

(iii) Localised exhaust or provision of effective isolation zoning of heat-generating equipment for 70% of critical heat sources and instrument

1 point each (up to 6 points)
### Part 2 – Lab Energy Performance

#### Green Mark Points

<table>
<thead>
<tr>
<th>Recovery</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>(iv) Reuse of return or recirculated cooled air from office/support areas for air make-up to laboratories areas or design for air recirculation within laboratory while meeting safety requirement.</td>
<td></td>
</tr>
<tr>
<td>(v) Apply run-around coil, wraparound heat pipe or sensible heat recovery between the exhaust and fresh airstreams. Heat recovery from exhaust systems to pre-cool outdoor air</td>
<td></td>
</tr>
<tr>
<td>(vi) Use of onsite recovered energy to reheat air</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Exhaust</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>(vii) Adopt VAV lab air flow and variable flow exhaust controls (Variable design)</td>
<td></td>
</tr>

</thead>
<tbody>
<tr>
<td>b. VAV fume hoods/BSC with occupancy sensor or sash position monitoring to reduce exhaust air ventilation</td>
<td>0.5 point</td>
</tr>
<tr>
<td></td>
<td>1 point (Up to 1 point)</td>
</tr>
</tbody>
</table>

(ii) Use of VAV fume hood/BSC with lower face velocity, while meeting safety requirements.

(iii) Sash position monitoring and/or monitoring of exhaust rate/face velocity linked to Building Management System (BMS), Energy Management System (EMS) or equivalent for purpose of trend logging and readouts

Lab 2-2c Plug load management and operation

Encourage design that optimises equipment used in the laboratory areas to reduce energy use.

(i) Proper heat load calculation with diversity and occupancy consideration or benchmarking of receptacle load based on comparable existing facilities or relevant data from benchmarking study to enhance cooling load estimate.

(ii) Provision of energy efficient labelled equipment by 3rd party such as Energy Star, Energy Labelling Scheme or equivalent for more than 80% of applicable equipment type

(iii) Use of energy efficient freezers for more than 80% of freezers

<table>
<thead>
<tr>
<th>Freezers</th>
<th>kWh/litre/yr</th>
</tr>

<td>&lt;5</td>
</tr>
<tr>
<td>&lt;5</td>
<td>&lt;3</td>
</tr>
</tbody>
</table>

Additional credit for Physical Laboratories for fulfilling Lab 2-2ci

1 point

(ii) Provision of energy efficient labelled equipment by 3rd party such as Energy Star, Energy Labelling Scheme or equivalent for more than 80% of applicable equipment type

(iii) Use of energy efficient freezers for more than 80% of freezers

1 point for tier 1
2 points for tier 2
<table>
<thead>
<tr>
<th>Part 2 – Lab Energy Performance</th>
<th>Green Mark Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>(iv) Active plug load management based on operation schedule (auto cut-off switches with user overrides)</td>
<td>1 point</td>
</tr>
<tr>
<td>(v) Overnight equipment management system (trend-log to monitor the consumption of the equipment)</td>
<td>1 point</td>
</tr>
<tr>
<td></td>
<td>(up to 4 points for 2-2c)</td>
</tr>
</tbody>
</table>

**Lab 2-2d Equipment Maintenance**

Systematic management plan to emphasis on the following:

- **(i)** Effective regular maintenance of equipment such as annual cleaning, defrosting of freezers, furnace & oven inspection, oil change program, servicing of specific devices
- **(ii)** Inventory optimisation such as
  - Storage of samples and materials in the most energy efficient way and effective preservation through appropriate measures and risk assessment (e.g. increase freezer temperature from -80°C to -70°C)
  - Inventory sharing between lab users

  1 point each

  (up to 2 points)

**Lab 2-2e Energy Efficient Practices, Design and Features**

Encourage the use of energy efficient features which are innovative and have positive environmental impact. Use of the following energy efficient features such as:

- **(i)** Calculation of Energy Efficiency Index (EEI) (1 point)
- **(ii)** Demand control ventilation based on active air quality sampling
- **(iii)** Ductless fume hoods for at least 80% of applicable equipment (1 point)
- **(iv)** Ductless biosafety cabinets with HEPA filter for at least 80% of applicable equipment (0.5 point)
- **(v)** Adoption of task lightings to reduce general lighting W/m² design (achieving overall W/m² with at least 40% improvement over code requirement) (1 point)

2 points for high impact item
1 point for medium impact item
0.5 point for low impact item

Up to 4 points

High impact item: Refers to items that are highly significant to overall design of laboratories
Medium impact item: Refers to items that will have measurable saving to the laboratories
Low impact item: Refers to items that are known to be beneficial to the performance of laboratories
### Part 3 – Resource Stewardship

#### Lab 3-1 Water

**Lab 3-1a Water Efficient Measures**
Reduce potable water consumption through the use of water efficient products and systems within laboratories, support areas and tenant’s areas only.

(i) Provision of products that are certified under WELS
   - Basin taps and mixers
   - Sink taps and mixers
* exclude lab specialised fittings and/or emergency fittings

Or

Achieve PUB Water Efficient Building Certification

(ii) Provision of laboratory equipment that is able to do water recycling or has water saving function such as recycling final rinse, reducing cold water consumption through mixers with condensate for autoclaves, etc.

(iii) Recycle water generated from regular flushing of laboratory safety fitting to maintain hygiene.

<table>
<thead>
<tr>

<td>3 points for Silver/Gold certification</td>
</tr>
</tbody>
</table>

0.5 point for each equipment type

1 point for each equipment type, saving more than 0.5% of facility’s water consumption

(Up to 5 points)

#### Lab 3-1b Water Usage Monitoring

Facilitate continual monitoring of water use within the development through the provision of water meters for major water uses.

For equipment only:

(i) Local private meters

(ii) Leak Detector

(iii) Smart meters with remote monitoring

<table>
<thead>
<tr>
<th>Equipment Type</th>

(Up to 7 points for 3-2b)
### Part 3 – Resource Stewardship

#### Lab 3-2c Material management
Centralised materials and chemical resources management
Encourage minimising of consumption of chemical and materials, using and disposal of them which has environment and financial benefit and promote sharing of scientific equipment within organisation.

- **(i)** Labelling with details of contents, ownership and (where relevant) hazard and emergency details
  - 1 point
- **(ii)** Records of equipment for tracking and ensure surplus stock can be re-distributed and to reduce unnecessary procurement.
  - 1 point

#### Lab 3-3 Waste

### Lab 3-3a Operational Waste Management

- **(i)** Provision of recycling facilities (for recycling glass, paper, metal as well as one for non-recyclable waste)
  - At a central location (1 point)
  - At every laboratory or strategic locations to encourage recycling (2 points)
  - (Up to 2 points)
  - 1 point
- **(ii)** Recycling of equipment packaging waste
  - 1 point
- **(iii)** Provide laundry service for lab coat to reduce wastage and encourage hygiene and safety.
  - 1 point
- **(iv)** Waste collecting and monitoring including hazard waste management
  - 1 point
- **(v)** Waste management improvement plan
  - (Up to 6 points for 3-3a)

### Part 4 – Smart and Healthy Laboratories

#### Lab 4-2b Acoustics

Occupied spaces are designed with good ambient sound level $\leq 55$ dBA (excluding lab equipment) or $\leq 65$ dBA (with lab equipment).

In the event where specific noisy equipment are deployed in the lab, it should be isolated and not applicable in the noise measurement.

1 point

#### Lab 4-2c Wellbeing and Safety

**Wellbeing**

(i) Controllability of temperature

(ii) Provision of ergonomic (adjustable) chairs/workstations for users

(iii) Wellbeing awareness
    - Display panel showing the level of CO$_2$, TVOC and/or chemicals for each laboratory

(iv) Designated breakout areas for occupants to relax/eat outside laboratory environment

**Safety**

(v) Space pressure control on monitoring system to prevent exfiltration of contaminants

(vi) Availability to relevant safety devices in each room/zone (eyewashes, safety showers, first aid kits)

(vii) Safety measures for performing lab tasks
    - Guidelines and visible notices to encourage safe usage

(viii) Periodic briefing on lab safety and emergency procedures

1 point each (up to 5 points)

#### Lab 4-3 Smart Building Operations

#### Lab 4-3a Energy Monitoring

Controls and monitoring are used to ensure that the equipment is functioning as designed and that energy is being saved.

For each laboratory:

(i) Provision of monitoring of individual electrical circuits/equipment, such as freezer, incubators etc, by means of power meter readings

(ii) Provision of monitoring of electrical loads with link to Building Management System (BMS), Energy Management System (EMS) or equivalent for purpose of trend logging and readouts

1 point

</tr>
</tbody>
</table>

| **Lab 5-1b Innovative Green Features** | |
| Open for recommendation (Items subjected to assessors’ review) | 2 points for high impact item |
| (Items subjected to assessors’ review) | 1 point for medium impact item |
| Low impact item (0.5 point each) | 0.5 point for low impact item |
| • Use of UVC emitter filter | Up to 10 points |
| • Recycling of lab related items such as | |
| ➢ Personal protective equipment (gloves, shoes and head covers etc). | |
| ➢ Laboratory experiment tools (plastic pipettes, syringe etc). | |
| ➢ Recycling or Treatment of chemicals used in the laboratory. | |
Annex A: Laboratory Types

1) Biological laboratories (Labs handling biological agents)
   - Biosafety Laboratories Level 1 to 4 including biological containment laboratories using infectious agents

2) Chemical laboratories (Labs handling chemicals)
   - Chemical Safety Design Laboratories Level 0 to 4
     (Referenced to ASHRAE Guideline for the Classification of Chemical Laboratories)
   - Analytical chemistry
   - Physical chemistry
   - Synthetic chemistry (inorganic & organic)
   - Special (high hazard) labs

3) Physical laboratories (No use of chemicals)
   - Materials testing laboratories (Physical properties)
   - Electronics/instrumentation laboratories

4) Support spaces
Exclusion List refers to lab under the following classification:
- BSL 3 or BSL 4
- ABSL 3 or ABSL 4
- CSDL 4

Lab ACH Control Band may refer to Singapore Standard or internationally accepted standard such as Cornell’s Lab Ventilation Management Programme.
