

CONTENTS

CHAPTER 1: STRUCTURAL CONCEPT FOR PRECAST CONCRETE SYSTEMS

1.1	General	2
1.2	Loadings And Load Tables	2
1.2.1	Design procedures in general	
1.2.2	Vertical and horizontal loads	
1.2.3	Load path description	
1.2.4	Load distribution	
1.3	Precast Concrete Systems	6
1.3.1	Building systems	
1.3.2	Structural systems for horizontal loads	
1.4	Slab Wall Structures	13
1.4.1	Statically determinate slab-wall systems	
1.4.2	Resolution of horizontal forces	
1.4.3	Statically indeterminate slab-wall systems	
1.5	Shear Wall Behaviour	20
1.5.1	Continuous layer method	
1.6	Structural Integrity And Design For Progressive Collapse	23
1.6.1	General	
1.6.2	Design for progressive collapse	
1.6.3	Design of structural ties	
1.7	Floor Diaphragm Actions	30
1.7.1	Method of analysis	
1.7.2	Transfer of horizontal forces	

CHAPTER 2: DESIGN OF PRECAST REINFORCED CONCRETE COMPONENTS

2.1	Precast Prestressed Hollow Core Slabs	40
2.1.1	Design considerations for hollow core slabs	
2.1.2	Design charts	
2.2	Design Of Precast Concrete Planks	57
2.2.1	General	
2.2.2	Prestressed concrete planks	
2.2.3	Reinforced concrete planks	
2.2.4	Design charts	
2.2.5	Design examples	

CONTENTS (CONT'D)

2.3	Design Of Precast Reinforced Concrete Beams	74
2.3.1	Design considerations	
2.3.2	Beam sections	
2.3.3	Construction methods and loading considerations	
2.3.4	Design for composite action	
2.3.5	Deflection	
2.3.6	Crack width	
2.3.7	Design charts	
2.3.8	Design examples	
2.4	Design Of Precast Concrete Columns	106
2.4.1	Design charts	
2.4.2	Design examples	
2.5	Design Of Precast Concrete Walls	121
2.5.1	General	
2.5.2	Design classifications of concrete walls	
2.5.3	Distribution of horizontal loads	
2.5.4	Infill precast walls in skeletal frame structure	
2.5.5	Cantilever precast concrete walls	
2.5.6	Vertical load capacity of precast walls	
2.5.7	Design charts	
2.5.8	Design examples	
 CHAPTER 3: DESIGN OF PRECAST CONCRETE CONNECTIONS		
3.1	General	142
3.2	Design Criteria	142
3.3	Design Considerations	142
3.3.1	Strength	
3.3.2	Ductility	
3.3.3	Volume change	
3.3.4	Durability	
3.3.5	Fire resistance	
3.4	Manufacturing Considerations	143
3.5	Construction Considerations	144
3.6	Types Of Joints	144
3.6.1	Compressive joints	
3.6.2	Tensile joints	
3.6.3	Shear joints	
3.6.4	Flexural and torsional joints	
3.7	Shear Friction Design Method	149

CONTENTS (CONT'D)

3.8	Static Friction	150
3.9	Bearing On Concrete	150
3.9.1	Horizontal shear friction reinforcement	
3.9.2	Vertical shear friction reinforcement	
3.10	Reinforced Concrete Corbel	158
3.10.1	Corbel design by strut and tie force system	
3.10.2	Corbel design by shear friction method	
3.11	Reinforced Concrete Nib	172
3.12	Beam Half Joint	175
3.12.1	Reinforcement as in figure 3.15	
3.12.2	Reinforcement as in figure 3.16	
3.13	Steel Sections Inserts	183
3.13.1	Steel inserts cast in column	
3.13.2	Steel inserts cast in beam	
3.13.3	Exposed sections	
3.14	Force Transfer By Welding	199
3.15	Shear Key Connection	202
3.16	Column Base Connection	203
3.16.1	General	
3.16.2	Socket connection	
3.16.3	Base plate connection	
3.17	Connection Of Precast Walls	216
3.17.1	Vertical wall joint	
3.17.2	Horizontal wall joint	
3.17.3	Vertical load capacity of joint concrete or mortar	
3.17.4	Isolated connection	
3.17.5	Structural ties in wall joint	
3.17.6	In-plane shear capacity	

CHAPTER 4: ILLUSTRATIONS ON DESIGN OF PRECAST CONCRETE BUILDINGS

4.1	Introduction	224
4.2	12-Storey Office Block	224
4.3	Residential Block	258

CHAPTER 5: PRECAST CONCRETE ASSEMBLY

5.1	General	266
5.2	Joints Used In Singapore Projects	267
5.3	Joints Used In European Projects	282

REFERENCE	332
